- Machine Learning Professional – Classification, Regression, Clustering, Model Validation, and Feature Importance using RapidMiner.
- Data Engineering Professional – Data Transformation, Data Processing, and Data Management using RapidMiner.
- Applications & Use Cases Professional – CRISP-DM, Machine Learning Applications, and Data Visualization.

WORK EXPERIENCE

PT. Grab Teknologi Indonesia | Dec 2025 - Present

KYB Sales Admin - OVO Onboarding Verification

- Verified merchant registrations on Grab Merchant (MSMEs & corporate) using Sales Management Portal (SMP) and Salesforce, including KTP, bank accounts, and legal documents (NIB, Deed, NPWP).
- Conducted user data verification on OVO (KTP & bank account). Verified 20.000+ merchants with productivity up to 150 tickets/day.
- Maintained high accuracy with error rate below 1%.

Content Regist Onboarding

- Activated merchant accounts by reviewing, filtering, and categorizing food and retail menu items to ensure compliance with platform standards.
- Maintained over 99% accuracy with an error rate below 1% while processing approximately 130 tickets per day.
- Worked efficiently in a fast-paced environment, ensuring tasks were completed accurately and within the required turnaround time.
- Consistently achieved and exceeded daily productivity targets while maintaining high-quality standards.

WORK EXPERIENCE

PT. Bali Insan Perkasa | Jun – Aug 2025 (Freelance)

Administrative & Finance Assistant

- Handled administrative tasks and job analysis
- Assisted finance operations as Finance Administrator

Teaching Assistant – Big Data & Analytics UTY | Feb – Jun 2024 (Part-Time)

- Assisted in practical sessions using RapidMiner
- Explained big data concepts, preprocessing, classification, and model evaluation

PT. Citra Van Titipan Kilat (TIKI) | Jan 2024 – May 2025 (Part-Time)

Administrative

- Managed administrative tasks including shipment records, delivery notes, and invoicing
- Supervised logistics operations, scheduled deliveries, and ensured smooth workflows
- Coordinated staff tasks and monitored operational efficiency

PROJECT

Google Apps Script Automation for Address Validation

PT. Grab Teknologi Indonesia

- Developed a Google Apps Script to automate merchant address formatting in Google Sheets.
- Integrated cross-sheet validation to compare address data with a reference sheet.
- Reduced manual checking, minimized data-entry errors, and improved verification efficiency.
- Received internal recognition for developing the automation tool.

Web-Based Library Information System with QR Code

Universitas Teknologi Yogyakarta | Final Project

- Developed a web-based library information system using Laravel, MySQL, and Bootstrap.
- Implemented QR Code technology to streamline book borrowing and return processes.
- Designed features for book management, member management, borrowing, returns, fines, and reporting.
- Improved library operational efficiency by digitizing administrative processes and reducing manual data entry.
